

STARK RELAX U-PLOWS, H-MODELS

- The plows are suitable for over 10 tons base machines
- Thanks to patented technologies, RELAX U-plow is the most versatile and efficient on the market

- The RELAX blade system keeps blades locked resulting in smooth plow trace and considerably less formation of packed snow.
 - The patented RELAX blade system protects the driver, base machine and plow from damage in collision because each single blade plate dodges obstacles.
 - Patented SMOOTH MOTION -wing turning system with two hydraulic cylinders enable extremely precise, controlled and wide range of motion. The plow is easy to use and work result is excellent.
 - STARK U-plow provides unique maneuverability of snow. Snow can also be collected by reversing with the U-plow. Plowing snow on the embankment is efficient and effortless.
 - FLOATING FRAME closely follows the ground. The sliding plates and the positioning of the flotation reduce bouncing of the plow while working.
 - Multiple hydraulic solutions are available for STARK U-plows. For example, four function valve increases the ease of operation and efficiency.
-
- Standard equipment: RELAX or ACS blade system, SMOOTH MOTION, FLOATING FRAME - technologies, adjustable support legs, rotating support plates, edge wear pads, reflectors, hazard taping.
 - Accessories: multiple blade options, Led lights set, support wheels, custom paint, multiple valve options, central lubrication system, control unit.

Product	Wing max. height (mm)	Centre section width (mm)	Wing width (mm)	Distance from fitting (mm)	Turning angle \pm (°)	Turning angle of wings (°)	Wing width in U-formation (mm)	Tilt angle (°)	Flotation height (mm)	Min. width with turning angle (mm)	Min. working width for turning angle (mm)	Cleaning width (mm)	Weight (kg) *
