

**STRONG, STRONGER, STARK**

## **STARK RSW -ROTARY SWEEPERS, C-MODELS**

- Powerful, versatile and agile brush device for year-round use
- The hydraulic motors are integrated inside the brush roller for protection against impacts
- 1000 mm lamellas, 2 hydraulic motors, vertical (250 mm) and horizontal float (12 °) guarantee a finished brushing mark even on uneven work sites.
- Cassette lamellas work best on snow, wood chips and sand, especially when there is a lot of material to be brushed.
- The large 30 ° turning angle allows brushing right next to walls, railings, etc.
- A separate turning frame keeps the brush roller straight at all turning angles.
- The coupling with a buffer protects the hydraulic motors of the brush roller in the event of start-up and collisions.
- The spring and gas shock absorbers hold the brush roller firmly to the surface to be brushed.
- The bolt-on STARK FIT adapters can be quickly replaced according to the quick coupler of the basic machine.
- Accessories: High-pressure dust binding system with hydraulic Dynaset water pump, directional high-pressure nozzle hose, low-pressure watering system with 12 or 24V water pump, directional low-pressure nozzle hose, 2- or 4-hose hydraulics, reverse valve 12 or 24V for brush roller.

*STARK attachments have been manufactured for over 40 years*
