KOBELCO

SK26

DO FULL-SIZED JOBS WITH A COMPACT MACHINE

Mini excavators are increasingly popular for work in confined spaces such as residential areas and buildings. But smallness alone doesn't satisfy users who also demand greater stability and first-rate operating performance. The KOBELCO SK26 mini excavator answers these needs with a high-output engine that provides plenty of power for tough, efficient operation. It also delivers excellent stability with superior weight distribution, a well-designed, comfortable cab equipped with an LCD monitor, and easy maintenance. These features make the SK26 mini excavator ideal for those who want powerful, basic functions and durable reliability. When you need to do a full-sized job with a compact machine, the SK26 is your answer.

COMFORT

Pleasant Work Environment

There is plenty of legroom, and the control lever, wrist rests, travel lever and control panel are all ergonomically positioned so that the operator can work for long hours without fatigue.

Comfortable Suspension Seat

The reclining, slide seat can be adjusted to match the operator's size and posture.

Wrist Rest

Wrist rests on the each control lever box ensure fatiguefree operation.

Excellent Air Circulation

The SK26 has a forced-air heater that keeps the cab comfortable conditions.

Travel Pedal

The travel pedal simplifies simultaneous operations while the machine is traveling.

Backlit Liquid Crystal Monitor

The backlit liquid crystal monitor is provided as standard. Perfectly integrated into the right-hand console, the screen provides excellent visibility even in bright sunlight or at night, giving ready access to information concerning operation and machine status.

Easy Access to Control Panel and Levers

Control panel

Travel high/low select switch

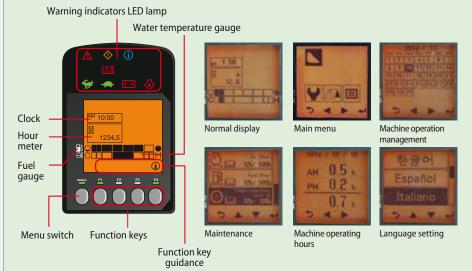

Amenities

- 1 Automatic ceiling light and 2 Storage compartment
- 3 Large cup holder

PERFORMANCE

Compactness and Versatility

With its compact design, the SK26 delivers fast work performance even in limited spaces.

Reliable Swing Power, Faster Working Speed

Boosted swing power and a top-class swing speed deliver shorter cycle times.

Swing Speed: 10.2min⁻¹

Powerful Digging

For more efficient work performance.

Max. Arm Crowding Force: 14.5kN

Max. Bucket Digging Force: 24.5kN

Powerful Travel

Travel Speed: 4.8/2.9km/h

Powerful Engine (ISO 9249)

Power Output: $17.6 \text{kW}/2,400 \text{min}^{-1}$

Auxiliary Circuit for Hammer or Auger

A proportional-control auxiliary line accommodates many accessories such as a hammer or auger, with the oil flow rate optimized for each device.

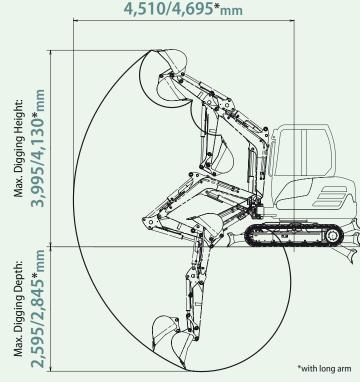

Auto-Idling System

Auto-Idling System which turns down the engine speed to idle when the machine has not been used for more than 4 seconds, then accelerates automatically when needed.

Wide Working Range

The SK26 has an impressive working range.

Max. Digging Reach:

Easy Transportability

Weighing just 2,600 kg, the SK26 is easily transported on a 3.5-ton trailer with plenty of room to spare for the simultaneous transport of a bucket or other attachment.

Compact Swing Radius

The SK26 has a very small swing radius that ensures easy access and efficient operation on sites where space is limited. The compact design provides excellent power, productivity and stability that allow you to work with confidence even under difficult conditions.

Minimum front swing radius: 1,900 mm

Tail swing radius:

1,160 mm

Tail overhang:
410 mm

Overall machine width:

1,500 mm

Exceptional Stability and Lifting Strength

A wide counterweight and excellent weight distribution provide the SK26 with impressive stability and exceptional lifting capacities.

Lifting Capacity: 1,050kg at 2.0m

Figures show the value of cab specs. with rubber shoe and standard arm. (ground level)

RELIABILITY

Reliable Construction

The SK26's tough durability makes it ideal for working in tight spaces and keeps repair costs down.

Cylinder Rod Guard

The cylinder rod guard is fitted as standard for boom cylinder.

Spring Steel Cylinder Rod Guard (Optional)

The spring steel cylinder rod guard is available as option for the boom, arm and bucket cylinder. The use of spring steel not only protects the cylinder rod, but gives resiliency to the guard itself.

LED Work Light

The LED work light is mounted under the boom to protect it from damage.

Dozer

Dozer cylinder rod guard protects dozer cylinder from damage.

SAFETY

Operator Safety

The SK26 has a full range of safety features that help prevent or reduce the severity of onsite accidents.

Reliable Cab/Canopy Structure

The high-strength cab/canopy meets FOPS 1 and TOPS standards for greater operator safety.

Optimum Visibility

The SK26 is equipped with 3 rear and side view mirrors. The operator can control the work area as well as the area around machine.

Safety Lock Lever

The safety lock lever permits entry and exit only when the levers are disengaged to prevent accidental operation.

Three LED Cab Lights (Optional)

Three LED cab lights can be fitted as option to provide a clear view during nighttime operations. The LED provides a powerful light while reducing energy consumption.

Hammer for emergency exit

MAINTENANCE

Easy Maintenance

The engine hood opens fully and components that require the most frequent checks are positioned for easy access, thereby reducing maintenance time.

Right Side

Fuel tank Battery Water separator

Under the Operator's Seat

•Generator •Starter motor

Easy Access to Engine

Notes

- Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities.
- Lift capacities are based on machine standing on level, firm, and uniform ground. User
 must make allowance for job conditions such as soft or uneven ground, out of level
 conditions, side loads, sudden stopping of loads, hazardous conditions, experience of
 personal city.
- 3. Arm top defined as lift point.

- 4. The above lifting capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lifting capacity or 75% of tipping load. Lifting capacities marked with an asterisk (*) are limited by hydraulic capacity rather than tipping load.
- 5. Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at
- 6. Lift capacities apply to only machine as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.

Note: This catalog may contain attachments and optional equipment that are not available in your area. And it may contain photographs of machines with specifications that differ from those of machines sold in your areas. Please consult your nearest KOBELCO distributor for those items you require. Specialist equipment is needed to use this machine in demolition work. Before using it please contact your KOBELCO dealer.
